City of Cole Camp **Request for Official Action**

RES ☐ **ORD X # 586** **Agenda Date:** 11/19/2026

Department/Office: Water & Sewer **Requestor Name:** Mayor Nicole Garrett

Subject: Revise Cross Connection and Backflow Prevention Ordinance

Recommended Action: Approve ordinance modification related to cross connection and backflow prevention

Summary: The Missouri Department of Natural Resources (MODNR) requires periodic updates to the City's Code of Ordinances to address cross connections and backflow prevention. This ordinance modification is based on the current model proposed by MODNR, with deletions noted in brackets and additions noted in bold typeface.

The most significant change is the removal of the grandfathering clause within the Cole Camp Code of Ordinances. This change is required for compliance with MODNR regulations. Failure to adopt a revised ordinance will result in negative findings during MODNR inspections.

Background: Cross connection and backflow prevention is a major component of a safe drinking water distribution system. This prevents potentially life-threatening contaminations for Cole Camp's water supply. The last time the ordinance was modified was 2006.
